Wood planks

Advantages

Wooden planks are perfect choice for spaces that need the durability of tile without sacrificing the style and charm of a wooden look. The natural wooden ceramic products achieve perfect imitation of parquet or wooden planks. They have significant advantages over standard parquet surfaces mostly because of their easy maintenance and cleaning, significantly lower cost, greater variety of sizes, exceptional strength and resistance to scratches, wear and tear.

Unique design

If you choose the trendy wooden design tiles, you can achieve a stylish and memorable interior by trying to lay them on the floor in a "herringbone" pattern - thus, recreating the look of parquet. Other non-standard ways of laying floor tiles with wood design is the overlapping pattern, with which you can give a unique look to the living room or the bedroom.

Functionality

Another advantage of porcelain tiles is their multifunctional application - you can choose to have the warm and cozy look of hardwood all over your home - in the kitchen, on the balcony, in the bathroom, the garden, the hallway or the bedroom, something you cannot do with natural wood flooring.

Lappato

Lappato is an Italian word for semi-polished tiles. Most lappato tiles are easy to identify as they have two depths. One level is normally shiny and reflects light, the other level is matt or even coarse by feel. This makes for a tile that both reflects light with some anti-slip properties. This delivers a surface that feels the same as a polished surface, less shined though, creating what we call "lappato look".

LAPPATO

Natural look

The tendency of natural look has been especially vivid in its expression in interior design. Wooden design is one of the latest trends. The collections by Ceramica Fiore combine the sophistication and style of expensive hardwood with the durability and versatility of porcelain tile.

The wooden tile trends are not something new in the market but in recent years they have acquired increasing popularity thanks to the technological advances in the process to create an accurate and precise recreation of natural elements on the tiles' surface.

Wooden designs by Ceramica Fiore combine the durability you need with the style you desire. The look of wooden floors gives a room the feel of luxurious comfort that never loses its charm.

Wood

Rectified Tiles

Rectified tiles are ceramic or porcelain tiles that have been precisely ground and machined to give them straight edges and exact dimensions. These tiles provide a perfect look, and allow extremely fine grout lines of 3mm or less. Because they're so carefully produced, rectified tiles can be used to create a very clean, even and symmetrical look. Advantages - near seamless, when done right, looks very straight and square.

PLACING REQUIREMENTS

It is required the use of minimum joint (aprox.1.5mm). We recommend that the joints are laid in staggered format with the maximum of the joints to be laid 20% of the length.

Legend

 Floor	 Wall	 Matt	 Glossy	 Special effect
 Porcelain	 Rectified	 Lappato	 Digital Technology	 15x60 and 30x60 rectified sizes can be used in modular combinations if laid with 2 mm joint.
 Plain colour&design	 Slight variation of colour&design	 Medium variation of colour&design	 Intensive variation of colour&design
